

Intro to Programming (/intro-to-programming)  
/ Git, HTML and CSS (/intro-to-programming/git-html-and-css)  
/ Class vs Id

Video

Text

Cheat sheet

## Summary

- A particular `id` can only be attached to one element per web page, while the same `class` can be attached to many different elements on the same page.
- When referencing **classes** in CSS, use: `.` (e.g. `.intro`)
- When references **ids** in CSS, use: `#` (e.g. `#line2`)
